REMARKS

This application contains claims 1 through 6 and 8 through 11, all of which are allowed. No claims are presently being amended.

The present application claims priority of U.S. Provisional Patent Application Serial No. 60/419,174, filed on October 17, 2002, under 35 U.S.C. 119(e). The Office has mailed several office actions, but none of the office actions has affirmatively acknowledged this claim to priority. Applicant respectfully requests that the Office issues a **supplemental notice of allowability that affirmatively acknowledges Applicant's claim to priority under 35 U.S.C. 119(e)**.

An Office Action dated January 12, 2005, on page 3, cites U.S. Patent No. 6,822,363 to Leijon. However, the Office has not listed U.S. Patent No. 6,822,363 on a PTO-892. Applicant respectfully requests that the Office issues a **PTO-892 that lists U.S. Patent No. 6,822,363**.

Applicant amended the specification to clarify a phrase, and to include reference numbers, as shown in the drawings.

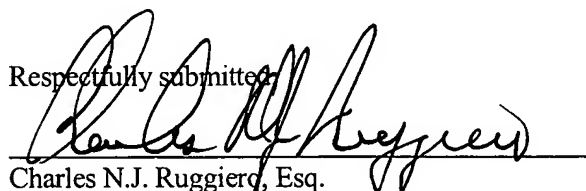

Applicant filed the application with informal drawings. Applicant is including herewith a set of replacement drawings that are of a better quality than the original drawings. No substantive changes are being made to any of the drawings.

None of the claims are presently being amended. As mentioned above, Applicant included a listing of the claims in order to ensure that there is no confusion as to the status of the claims.

Since this amendment neither raises new issues nor requires further consideration, entry is respectfully solicited.
